

# Example 1

There are   2   tens and   6   ones.

  2   tens +   6   ones =   26   .

## Example 2

There are   3   tens and   2   ones.

  3   tens +   2   ones =   32   .

There are \_\_\_\_\_ tens and \_\_\_\_\_ ones.

\_\_\_\_\_ tens + \_\_\_\_\_ ones = \_\_\_\_\_ .

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Pick any number from the 100 square and use the part whole model from the examples to find the value of the tens and ones.

## Problem Solving.

42

42

Emma and Bobby both try to build the same number.

Who is correct?
